

Nuclear Moisture Detection

The NEEMS Roof Warranty Program

is a structured, comprehensive approach to detecting problems, and providing viable cost-effective solutions. In addition to extending the life of your existing infrastructure, or putting a warranty back onto a roof that the warranty is expired, NEEMS also allows our customers to incorporate energy saving innovations for long term sustainability. B-E Controls believes that energy efficiency and structural improvements overlap and should be considered and evaluated together.

Ask about maximizing your **Return On Investment** with HVAC & lighting solutions.

Locate the leak **before** it \$oaks you!

What you can expect out of the NEEMS Program:

-  Complete nuclear scan of roof system to detect moisture levels.
-  Analysis of scan results and visual inspection data.
-  Evaluation of HVAC system and it's controls.
-  Identification of energy efficient lighting.
-  Review windows throughout the facility.
-  Discussion about solar panels.
-  **Positive ROI**

See reverse side for a complete listing of services offered.

All your facility needs in one envelope!
